

Countermeasures for your house against wind and flood damage & earthquakes!

Outside your house

Check if the antenna is properly set up.

Check if the downspout is clogged with fallen leaves or dirt.

Check if the outer wall has any cracks or suffers from delamination.

Check if the gutter is clogged with rubbish or sediment.

Check if any roof tiles are out of place, cracked or broken.

Check if any window panes have cracks or if any window frames are rattling.

Check if there are any objects which can be blown away on a veranda or in a yard.

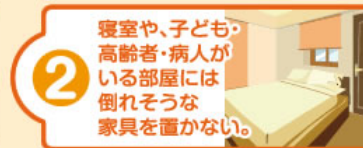

Check if concrete block walls have any cracks or are damaged.

Inside your house

1. Secure a safe place with no furniture.

3. Take measures to prevent furniture from toppling or falling down.

屋内

2. Do not place furniture that could topple in bedrooms or in the rooms of children or elderly or sick persons.

4. Do not place anything in doorways or hallways.
