

内水はん濫とは・・・下水道や側溝などの雨水が川に排水されず住宅地などが浸水すること

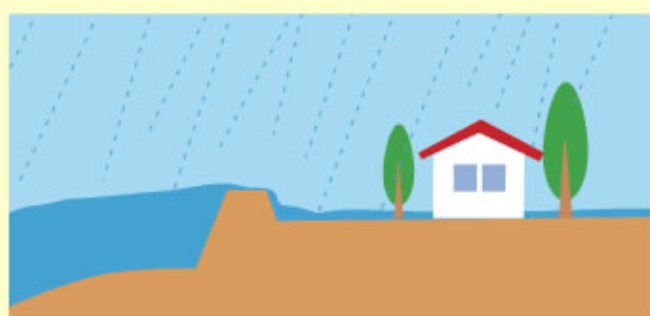

下水道などの排水施設の能力を超えた場合

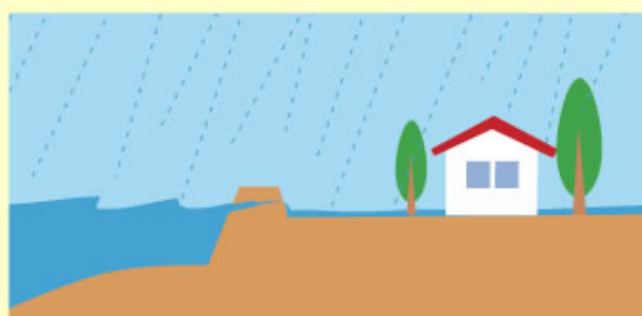

川の水位が高くなった場合

外水はん濫とは・・・川の水があふれ出し住宅地などが浸水すること

川の水が堤防を越えた場合

堤防が壊れた場合

## Things to know about flooding

### What is inland water flooding?

It means that houses and buildings are flooded with rainwater from sewage and gutters, which has not drained into rivers. This happens when:

The amount of rainwater exceeds the capacity of drainage systems, such as sewage.

The river water level becomes higher than drainage outlets.

### What is river water flooding?

It means that houses and buildings are flooded with overflowing river water. This happens when:

River water rises above levees.

Levees are broken.
